GENU LIGAFLEX[®] ROM

HINGED KNEE BRACE WITH RANGE OF MOTION CONTROL

Indications

- Stabilization for mild to moderate ligament injuries and instabilities
- Early stage OA
- Post-operative treatment where the brace supports healing and rehabilitation
- Ideal intermediate-level product for sporting activities
- Meniscus injuries/postoperative meniscal repairs

Ease Of Use

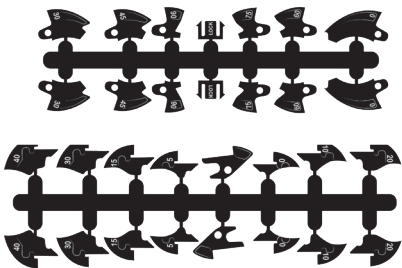

- Low profile tension buckles
- Anterior opening for easy application
- Premium velcro tabs

Suspension

- Exclusive synergistic suspension strap
- Patented integrated anti-slip silicon knitting

Adjustable Hinge

- Hinge cover opens to easily insert flexion/extension stops to restrict range of motion.
- TM5+ hinge that replicates the natural movement of the knee

Exclusive Townsend Motion Hinge

Stability

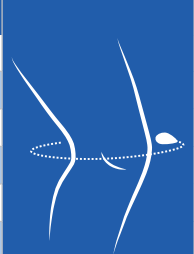

- Contoured aluminum uprights improve fit and control
- Double adjustable straps

Comfort

- Anatomic knit delivering medical grade compression

PDAC Approved L1832/L1833
