

THUASNE

Rebel Reliever®

Off-loading knee brace

U03309

Indications

- Moderate to severe unicompartement femoral-tibial osteoarthritis of the knee.
- Unicompartement knee joint degeneration requiring offloading.
- Post-operative offloading of a single compartment (articular or meniscus cartilage defect or osteochondral defect).
- Knee joint instability after injury or surgery on the cruciate and/or collateral ligaments (ACL, PCL, LCL, MCL).

Target patient

Arthritic patient requiring maximum offloading

Features

Offloading of the damaged compartment: 3-pressure point system with Loadshifter system

Freedom of movement: TM5+ hinge reproducing the knee's natural movements.*

Open zone at the back of the knee

Hold: suspension strap above the calf and specially shaped tibial shell to prevent rotation

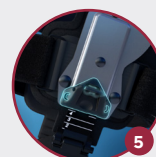

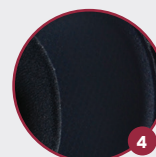

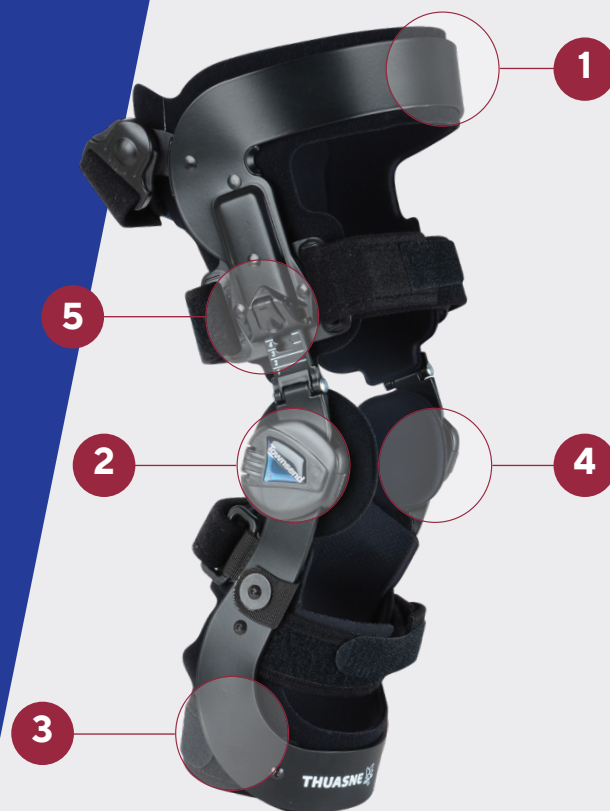

Comfort: inner foam lining

Practical: fitting buckle and tool-less adjustment of offloading level (Snap lock system)

2 models: right and left

Options

Also available in a custom format. Please see order form on overleaf."

Measurement Data

Required for "custom-fitted" Assembly*

☐ Custom-fitted (Fabricated from three leg measurements)*

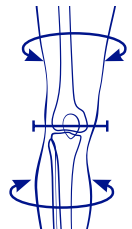

If your patient has a disproportionate leg, Thuasne USA will customize the assembly of your patient's brace. Please provide leg measurements beside the illustration, below.

More than one size difference between thigh and calf may require a full custom knee brace - please refer to the SpryStep Knee Brace

_____ Circumference 6 inches
above mid-patella

_____ Medial-Lateral Knee Width (not
circumference) at knee center

_____ Circumference 6 inches
below mid-patella
